DECLARATION

We the students of final year B.Tech in INFORMATION SCIENCE AND TECHNOLOGY at Presidency University, Bengaluru, named Bhagyalaxmi, Sanjana C Rao and Yashaswini, hereby declare that the project work titled "**Automatic Change Detection in SAR Satellite Images**" has been independently carried out by us and submitted in partial fulfillment for the award of the degree of B.Tech in INFORMATION SCIENCE AND TECHNOLOGY during the academic year of 2025-26. Further, the matter embodied in the project has not been submitted previously by anybody for the award of any Degree or Diploma to any other institution.

BHAGYALAXMI	USN: 20221IST0058
SANJANA C RAO	USN 20221IST0072
YASHWASWINI	USN: 20221IST0083

PLACE: BENGALURU

DATE: 7)

ACKNOWLEDGEMENT

For completing this project work, we have received the support and the guidance from many people whom I would like to mention with deep sense of gratitude and indebtedness. We extend our gratitude to our beloved Chancellor, Pro-Vice Chancellor, and Registrar for their support and encouragement in completion of the project.

I would like to sincerely thank my internal guide **MR. KIRUBAKARAN N**, Assistant Professor, Presidency School of Computer Science and Engineering, Presidency University, for his moral support, motivation, timely guidance and encouragement provided to us during the period of our project work.

We are also thankful to **Dr. Pallavi R**, Professor, Head of the Department, Presidency School of Information Science and Technology Presidency University, for her mentorship and encouragement.

We express our cordial thanks to **Dr. Duraipandian N**, Dean PSCS & PSIS, **Dr. Shakkeera L**, Associate Dean, Presidency School of computer Science and Engineering and the Management of Presidency University for providing the required facilities and intellectually stimulating environment that aided in the completion of my project work.

We are grateful to **Dr. Sampath A K**, and **Dr. Geetha A**, PSCS Project Coordinators, **Mrs. Benitha Christinal J**, Program Project Coordinator, Presidency School of Computer Science and Engineering, or facilitating problem statements, coordinating reviews, monitoring progress, and providing their valuable support and guidance.

We are also grateful to Teaching and Non-Teaching staff of Presidency School of Computer Science and Engineering and also staff from other departments who have extended their valuable help and cooperation.

BHAGYALAXMI

SANJANA C RAO

YASHASWINI

Abstract

As every organization today thrives on digital communication, the way data moves across a network needs to be monitored. In this project, the development of a "Automatic change detection in SAR satellite image" for capturing, observing, and interpreting packets in real time while they travel through a network is discussed. Thus, there is a goal to develop a tool that can collect not just raw traffic but translate it into meaningful insights of protocol distribution, patterns of suspicious activities, bandwidth utilization, and active flows among interacting devices.

The system utilizes packet-capturing mechanisms to intercept network frames and then processes them through multiple analysis modules. These modules help in identifying common protocols, detecting anomalies, and visualizing the traffic behaviour in an understandable format. By offering a simplified view of what happens behind the scenes on a network, the tool supports administrators in troubleshooting, performance monitoring, and basic security assessments.

Overall, this project demonstrates how low-level packet inspection can be combined with other analytical techniques to give a better view of network health. The prototype developed here acts as an accessible and practical solution for students, small labs, or organizations looking to gain better visibility into their network activity without reliance upon expensive commercial tools.
